NDT Inspectors
Qualified?

AEIS brings NDT Training and Certification to New York Metro Area

Most Construction Codes require certified NDT Level II Inspectors as per SNT-TC-1A, CP-189 and/ or NAS 410. AEIS can help you achieve your Training, Qualification and Certification objectives. Atlas Evaluation & Inspection Services offers NDT training in the NY Metropolitan area. Our training facility is located in Rahway, NJ—about 30 minutes from Manhattan. Classes are also offered at clients' facilities throughout the globe for a class size of six or more candidates.

- **NDT Program Development** - We can assist you in developing and maintaining your in-house NDT Program in accordance with ASNT SNT-TC 1A, ANSI CP 189, NAS 410 or other certification standards.
- **Quality Audits** - We can perform Quality audits of your NDT operations to help you achieve your continual improvement goals.
- **Level III Consultation** - We provide Level III consultation to suit your needs.
- **Experience** - NDT Personnel Qualification standards require certain experience before certificates can be issued. We have experienced ACCP NDT Level III and II personnel available on staff for guidance and training.
- **Training Material** - In addition to our comprehensive training material, carefully selected training guides and aids issued by ASNT/AWS publication department are utilized for training. Candidates are also issued original study guides in bound book format.
- **Equipment** - State-of-the-art equipment, huge inventory of Flawed Specimens, and Calibration Blocks enhance your training experience.
- **Trainers** - Our trainers have a combined experience of over 95 years and comprise of NDT Level III Professionals, Mechanical Engineers, Metallurgists and Chemists.
- **Certification** - On successful completion of stated requirements, course completion certificates are issued by an ASNT ACCP NDT Professional Level III.
- **Demos** - As part of our training curriculum, we include live practical demonstration of all mechanical, chemical, metallurgical and non-destructive testing techniques at our laboratory. This ensures a more comprehensive understanding of the concepts.
